

Erasmus+ Robotics:On Lithuania

Workshop #1

In first week all participants were gathered and introduced to terms, tasks and activity that they're having throughout these five weeks. Students who participated in C1 shared their experiences, emotions and the new things they have learned.

Workshop #1

Students were introduced to SWOT program that will take place next week, they were given a task to start communicating with participants from other countries if possible to share their progress and get to know each other

Workshop #2

Participants from C1 talked about SWOT, all students came up with an idea for problem that their robot is going to solve, discussed weather or not it's possible, useful, looked up to pros and cons. Made a list of pros and cons to see if it's really worth.

Workshop #2

Also some students were picked to start writing motivational speech that they will be giving at school. Other students started to design advertisements about the project.
